3. The following is an examiner's statement of reasons for allowance: The prior art as a whole does not teach or fairly suggest the method steps of: "providing a power source, connecting the power source to the electrical conductor winding that having insulation and adhesive as resin thereon and curing the adhesive by energizing by providing the electric power from the power source to heat the adhesive, wherein the curing of the adhesive by energizing the electrical conductor so that a current greater than a rated current of the transformer winding flows through the electrical conductor" in combination with the rest of the limitations set forth in the present invention's claims (see claim 1 as amended). Further, the indicated allowable subject matters of claim 2 has been fully incorporated in to an independent claim 1 which made pending claims 1, 3-9, 11-20 allowable over the prior art.
